

Monofoil® — Fitness Facility 30-Day Testing Evaluation

12/6/2010 – 1/6/2011

Testing protocols involved a Hygiena SystemSure Plus ATP Hygiene Monitoring System. The ATP meter measures adenosine triphosphate. Microbial contamination contains ATP. 0 – 100 = CLEAN, 100 – 200 = MARGINAL, and over 200 = in need of sanitation. Measurements were taken in an Indiana fitness facility.

Test Area	Date	Initial Method	Initial Reading	30sec Re-Test	% 30sec Decrease	Re-Test Method	Re-Test Date	2nd Reading	% Total Decrease
Life Fit. Bench	12/6/2010	Test/ MonoFoil Treatment	539	47	91%	Test Only	1/6/2011	38	92%
