

Untreated

The Challenge— Protecting Your Athletes Against MRSA, Staph, H1N1, & Other Bacteria

Are your athletes at risk in your facility? What can you do to protect them against these virulent infections?

Treated

THE SOLUTION? MonoFoil®—Clean, Redefined!

Only **MonoFoil® Antimicrobial** liquid utilizes organic technology to impart a long lasting defense against a broad range of microorganisms including: MRSA, Staph, H1N1, & Other Bacteria. **MonoFoil®** also provides a durable barrier against fungi that cause problems such as “black mold,” mildew and algae.

Bacteria, mold, mildew and fungi can build-up on products, making them unclean, unhygienic, or discolored. **MonoFoil® Antimicrobial** provides permanent surface protection, continuously working 24/7 to inhibit the growth of microbes.

MonoFoil® Provides A Healthier Environment!

Monofoil® is Cost-Effective

*One application of **Monofoil®** will keep germs under control for at least 90 days. This means you don't have to reapply **Monofoil®** every week and still have the active antimicrobial protection you need. **Monofoil®** WILL save time & money compared to other methods.*

Monofoil® is EPA Registered & USDA Compliant

***Monofoil®** is the only chemical bound, non-leaching additive that provides unmatched safety and performance. Tests show it out-performs 1% silver products with statistical significance that rivals all standards in any study.*

Monofoil® vs. Bleach & Disinfectants

*Bleach and disinfectants lack the extended durability like **Monofoil®**. Bleach also releases gases that burn eyes and creates fumes. Also, the chemicals in bleach permanently denature microbes, allowing them to mutate into “superbugs”.*

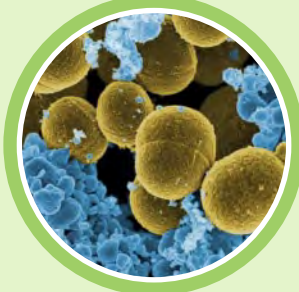

MonoFoil® Antimicrobial

MonoFoil® should be added to uniform laundry and used to treat pads, helmets, and equipment to provide continuous antimicrobial protection. When using **MonoFoil®** fog, spray or wipes to clean and protect surfaces, it provides an invisible defense that rids the

surface of harmful microorganisms. It will continue to provide protection weeks and often months without repeat application. When compared to bleach, **MonoFoil®** is over 30 times more durable, requires 90% less product, and takes 96% less time to apply.

Benefits for Using Monofoil®

- Provides a safer, healthier environment for your athletes
- Reduce or eliminate otherwise stubborn malevolent microorganisms
- One treatment every 90 days eliminates 99% of germ/bacteria/virus/infections
- Terminates molds, mildew and fungus, as well as eliminates odors caused by these
- Extend the life of uniforms that would be discarded due to odor, stain, or deterioration
- Applied during rinse cycle will be protected items for 30 future washings
- Provide your own insurance against liability issues resulting from outbreaks
- EPA and USDA approved means you are safe using **Monofoil®**
- Is green, meeting environmental standards for industrial and institutional cleaners

Where to Apply Monofoil®

- **Athletic Training Rooms** – tables, whirlpools, ice machines, and furniture
- **Locker Rooms** – lockers, showers, bathrooms, benches, floors, and walls
- **Mats** – wrestling, fitness areas, cheerleading, and exercise mats
- **Fitness Rooms** – cardio equipment, weight training, benches, and exercise areas
- **Equipment** – helmets, headgear, shoulder pads, shin guards, shoes, spikes, and gloves
- **Laundry** – practice & game gear, towels, socks, shorts, shirts, sweatbands, and bags
- **Vehicles** – vans, buses, planes, and injury carts
- **Turf fields** – artificial grass and synthetic systems
