# Protect Your Team From Getting Sidelined by Infections

Treated

Protecting your athletes against MRSA, Staph, H1N1, & other dangerous bacteria is a major challenge and responsibility. Germs are everywhere, and the locker room provides the perfect environment for them to grow and wreak havoc on your athletes—causing infections, illness, and odors.

## What Can You Do To Protect Your Athletes?

Integrate **MonoFoil® Antimicrobial Laundry Detergent** into your locker room's laundry facilities. **MonoFoil® Technology** can mitigate your athletes' risks against dangerous bacteria—providing a safer, healthier environment for your team.

## Benefits of Adding MonoFoil® Technology To Your Laundry:

- Eliminates 99% of germs/bacteria/virus/infections—keeping your athletes safer & healthier
- Terminates molds, mildew, and fungus, and the odors caused by these
- Reduces or eliminates otherwise stubborn dangerous microorganisms
- Extends the life of uniforms that would be discarded due to odor, stain, or deterioration
- Applied during rinse cycle will protect items for up to 30 future washings
- EPA registered and USDA compliancy means your team is safe using **MonoFoil®**
- Green technology—meeting environmental standards for industrial and institutional cleaners, with zero toxicity!
